Shadowrun Sprawl: Wilds Catalyst Game Labs 2013-09-11 You live in any sprawl long enough, you ll find out that there s a lot more to it than businessmen and soykaf stalls. Any sprawl worth its mettle has its dark corners, its forgotten places, its spots that are just as wild and untamed as the deepest rainforest. Seattle, the prime metropolex in the world for shadowrunning, is filled with such places, and Sprawl Wilds gives shadowrunners a chance to tour them. From a fortress-like Barrrens farm recovering from a mysterious attack to a dark secret hidden in a clinic, runners have a chance to see the sites most people never encounter, and uncover information that some people want to stay secret at any cost. They ll meet jaded smugglers, wary police officers, passionate activists, hardened criminals, wounded warriors, and at least one deranged killer. The questions are, will they survive long enough to collect a paycheck and how much of the sprawl will be nothing more than dust when they re done with it? Sprawl Wilds is a collection of Shadowrun Missions developed for major summer gaming conventions. These adventures have been adapted for both Shadowrun, Twentieth Anniversary Edition and Shadowrun, Fifth Edition, and they provide hours of shadowrunning goodness for experienced street veterans and new shadowrunners alike. With complete game information, including NPC stats, these adventures are poised to plunge players into urban chaos! *PCB Design for Real-World EMI Control* Bruce R. Archambeault 2013-06-29 Proper design of printed circuit boards can make the difference between a product passing emissions requirements during the first cycle or not. Traditional EMC design practices have been simply rule-based, that is, a list of rules-of-thumb are presented to the board designers to implement. When a particular rule-of-thumb is difficult to implement, it is often ignored. After the product is built, it will often fail emission requirements and various time consuming and costly add-ons are then required. Proper EMC design does not require advanced degrees from universities, nor does it require strenuous mathematics. It does require a basic understanding of the underlying principles of the potential causes of EMC emissions. With this basic understanding, circuit board designers can make trade-off decisions during the design phase to ensure optimum EMC design. Consideration of these potential sources will allow the design to pass the emissions requirements the first time in the test laboratory. A number of other books have been published on EMC. Most are general books on EMC and do not focus on printed circuit board is intended to help EMC engineers and design design. This book engineers understand the potential sources of emissions and how to reduce, control, or eliminate these sources. This book is intended to be a ‘hands-on’ book, that is, designers should be able to apply the concepts in this book directly to their designs in the real-world.

Slave Stealers Timothy Ballard 2018-09-04 Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother’s house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day “underground railroad” which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings—Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The “Conductor”; Abraham Lincoln--the “Great Emancipator”; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all. Her Tender Tyrant Elizabeth Lennox 2014-12-19 Marcus moved through life expecting everything to be logical. Science could explain everything and he’d learned to make enormous profits understanding science. So when he runs into the illogical Juliette, his mind has a hard time understanding why she would walk down the street singing and dancing. There wasn’t any music! But no matter how much he craved logic and reason, his body craved Juliette more. Juliette is fascinated by Marcus’s stoicism. How could he walk down the street and not feel the joy in the sunshine? How could he ignore the sounds of the grasshoppers and birds? Or smile at the perfection of a flower? And how could her mind and body need a man who didn’t understand the joy of living life for the moment? Enjoy the fifth book in The Alfieri Saga!

Medical Anthropology Andrea S. Wiley 2009 Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Introduction to Crystallography Donald E. Sands 2012-06-14 Clear, concise explanation of logical development of basic crystallographic concepts. Topics include crystals and lattices, symmetry, x-ray diffraction, and more. Problems, with answers. 114 illustrations. 1969 edition.

Quaker Writings Thomas D. Hamm 2011-01-25 An illuminating collection of work by members of the Religious Society of Friends. Covering nearly three centuries of religious development, this comprehensive anthology brings together writings from prominent friends that illustrate the development of Quakerism, show the nature of Quaker spiritual life, discuss Quaker contributions to European and American civilization, and introduce the diverse community of Friends, some of whom are little remembered even among Quakers today. It gives a balanced overview of Quaker history, spanning the globe from its origins to missionary work, and explores daily life, beliefs, perspectives, movements within the community, and activism throughout the world. It is an exceptional contribution to contemporary understanding of religious thought. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. Rooted and Rising Leah D. Schade 2019-11-01 Rooted and Rising is for everyone who worries about the climate crisis and seeks spiritual practices and perspectives to renew their capacity for compassionate, purposeful, and joyful action. Leah Schade and Margaret Bullitt-Jonas gather twenty-one faith leaders, scientists, community organizers, theologians, and grassroots climate activists to offer wisdom for fellow pilgrims grappling with the weight of climate change. Acknowledging the unprecedented nature of our predicament—the fact that climate disruption is unraveling the web of life and threatening the end of human civilization—the authors share their stories of grief and hope, fear and faith. Together, the essays, introductory sections, and discussion questions reveal that our present crisis can elicit a depth of wisdom, insight, and motivation with power to guide us toward a more peaceful, just, and Earth-honoring future. With a foreword by Mary Evelyn

Despite economic cycles, the idea of using technology to make a company more efficient and competitive—or perhaps even reach a new market—is appealing to all but the most desperate and cash-starved companies. More and more often, those companies look to technology consultants to fulfill their needs. There are real advantages to being a consultant. You make contacts with a lot of different people; you get exposure to many industries; and most important, unlike a software developer in the IT department for a brick-and-mortar company, as a technology consultant, you are the profit center...so long as you are billing. Consulting can be hugely rewarding—but it’s easy to fail if you are unprepared. To succeed, you need a mentor who knows the lay of the land. Aaron Erickson is your mentor, and this is your guidebook.

Erickson has done it all—from Practice Leadership to the lowest level project work. In The Nomadic Developer, he brings together his hardwon insights on becoming successful and achieving success through tough times and relentless change. You’ll find 100% practical advice and real experiences—his own and annotations from those in the trenches. In addition, renowned consultants—such as David Chappell, Bruce Eckel, Deborah Kurata, and Ted Neward—share some of their hard-earned lessons. With this useful guidebook, you can objectively assess whether the consultant’s life makes sense for you. Break into the business and build a career path that works. Avoid the Seven Deadly Firms by identifying unscrupulous technology consultancies and avoiding their traps and pitfalls. Understand the business models and mechanics that virtually all consulting firms use. Master secret consulting success tips that are typically left unstated or overlooked. Gain a competitive advantage by adding more value than your competitors. Continue your professional development so you stay billable even during bad times. Profit from both fixed-bid and time-and-materials projects. Build a personal brand that improves your resiliency no matter what happens.

Nessa Morgan 2014-03-06 I feel I’m losing it all, everything I’ve kept near and dear—I’m shoving it away because I don’t know how to keep my life in order anymore. What was simply fine and okay is no longer either. My world is growing into one black hole, dragging me down. I’ve discovered my monsters, I’ve found my demons, and to make sure no one goes down with me, I’ve given them an out. I’ve given Zephyr the out he deserves. But was it worth it? Just when Joey’s life seemed to be getting better, one night sends her memory into overdrive. Not able to cope, she pushes away the only friend she could count and tries to cut out all the rest. When a new student walks into her class and is assigned the seat next to hers, Joey’s not sure whether punch him or kick him below the belt with how forward he is. All this while fighting the urge to go back and beg Zephyr to be hers again. When the unthinkable happens, she has a hard decision to make—the hardest she’s ever had to make: to stay or go.

Sex Shamans Kamaladevi McClure 2020-02-04 20 transformative stories and sexual healing practices from international pioneers in the sexual shamanism movement • Reveals intimate details about how each sex shaman overcame personal struggles with heartache, jealousy, mental illness, or social shame to realize their calling as a sacred sexual healer • Includes 20 in-depth embodiment exercises such as soul gazing, contacting your spirit guides, sexual divination, energetic sex, self-pleasuring, moon blood rituals, and sacred sexual storytelling • Includes contributions from 20 diverse voices in the sexual shamanism community, all part of the mystery school ISTA: International School of Temple Arts Drawing on traditional and modern practices, a sex shaman uses the power of erotic energy as a healing medicine. They channel divine love and embrace sexuality freely, practicing polyamory, sexual healing, and even sex magic. They teach tantra, trance dance, kundalini yoga, and other techniques for healing shame, guilt, fear, and sexual trauma. Designed to guide the reader on a journey into their own sacred sexual awakening, this book shares true stories from 20 visionary pioneers in the sexual shamanism movement, all of them associated with the International School of Temple Arts (ISTA), a mystery school that works to illuminate the path of sexual shamanism and heal the split between sex and spirit, release the shame surrounding sexual awakening, and inspire more sexual liberation around the world. The teachers reveal intimate details of their life stories and sexual awakening journeys, showing how, by surrendering to the wisdom of the erotic current of the universe, transformation occurs. Each story is accompanied by an in-depth embodiment exercise with step-by-step instructions, including soul gazing, contacting your spirit guides, sexual divination, energetic sex, self-pleasuring, moon blood rituals, and sacred sexual storytelling. Underlying these exercises is the belief that the body is a temple that opens with pleasurable worship so spirit may dwell more fully within. The 20 contributors include Baba DeZ Nichols, Bruce Lyon, Crystal Dawn Morris, Dawn Cherie, Deborah Taj Anapol, Ellie Wilde, Janine Ma-ree, Kamaladevi McClure, Komala Lyra, Laurie Handlers, Lin Holmquist, Matooka Moonbear, Mia Mor, Ohad Pele Ezzrah, Patrick Olterman, Raffaello Manacorda, Ria Bloom, Sean O’Faolain, Stephanie Phillips, and Stephen SoulLove. **Vampire Solstice** Starfields 2006-04 For the Vampire community, the Solstice Choosing has been the holiest night of the year - for a hundred thousand years. Unsafe at Any Meal Renee Joy Dufault 2017 Each year, Americans consume hundreds of food products that contain truly dangerous compounds, including heavy metals, pesticides, and other harmful additives—with the blessing of the FDA. Why is this happening and why haven’t you heard about it? In *Unsafe at Any Meal*, Dr. Renee Dufault, former food investigator for the Food and Drug Administration, provides the startling answers. While at the FDA, Dr. Dufault discovered that mercury—a highly toxic metal—was contaminating the plumbing systems of many food manufacturing plants. Upon further examination, she discovered that the same mercury was also evident in a number of processed foods commonly sold in supermarkets. When Dr. Dufault revealed these disturbing findings to her superiors, she was told to stop her investigation. Her continued efforts to raise the issue always met with a dead end, so she chose to take an early retirement from the FDA. Dr. Dufault then devoted her energy to making the public aware of the insidious dangers that contaminate our food. In 2010, she founded an organization of scientists to study the scope of this problem and has published numerous research articles on the topic with little fanfare. To expose what still seems to be a well-kept secret by the FDA, she has written *Unsafe at Any Meal* to provide consumers with the information they need to know. The book begins with the author’s story leading up to the creation of this work. It then describes the various toxic substances that are most commonly found in our food supply, and explains how they affect your genes, health, and the surrounding environment. After examining the Standard American Diet, which is sorely lacking in disease-preventing nutrients, it discusses the country’s trend toward consuming a skyrocketing amount of ingredients that can contain heavy metals. It further shows how exposure to these heavy metals can contribute to conditions such as ADHD or autism. Also included is a helpful guide to reading food labels, recognizing misleading marketing tactics, and knowing what to look for—and what to look out for—in the aisles of your grocery store. Over fifty years ago, Rachel Carson’s book *Silent Spring* exposed the dangers of DDT in our food supply. Unfortunately, it seems that the problem of food contamination has actually become worse. Backed by research and first-hand experience, Dr. Dufault reveals how the FDA has failed us, and outlines how you can protect yourself and your family by knowing what to avoid and by filling your kitchen with food that is clear of toxins.
