**Buried** Ken Wylie 2014-10-07 On January 20, 2003, at 10:45 a.m., a massive avalanche in the Selkirk Range of British Columbia struck three members of two guided backcountry skiing groups and buried them. After a frantic hour of digging by those still standing, an unthinkable outcome became reality: seven people were dead. The tragedy made international news, splashing photos of the seven dead Canadian and US skiers on television screens and newspaper pages. The official analysis was that guide error was not a contributing factor in the accident. This interpretation was insufficient for some of the victims' families, the public and some members of the guiding community. Buried is the assistant guide's story. It renders an answerable truth about what happened by delving deep into the human factors that played into putting people in harm's way as well as the peace that comes from accountability and the personal growth that results from understanding.

**Essential Cases on Misconduct** Benedict Winiger 2018-01-22 The various national European legal systems offer a broad range of responses to the question of what can be regarded as wrongful behaviour or fault. The present work systematically examines these two important prerequisites for tortious liability under the combined heading of 'misconduct'. Unlike current textbooks, national casebooks and monographs, it builds on the experiences gathered in the national legal systems over the past decades and thereby fills a major gap which still exists today. It thus does what the previous volumes in the 'Digest of European Tort Law' series did for other key elements of tort law, namely natural causation and damage. Once again, the publication contains a selection of the most important cases from 28 states across Europe as well as cases handed down by European Union courts; it also highlights cases from earlier periods of legal history. For each case, the facts and the relevant court decision are presented and these are then accompanied by an analytical commentary. In addition, the editors provide comparative analyses of the cases reported and a special report is dedicated to how key decisions would be resolved under model European rules on tort law. The editors believe that the material gathered here may provide guidance for an organic convergence of the national legal systems in Europe. It constitutes the basis of an *acquis commun* that is infinitely richer (though also much more complex) than the rather bland and abstract concepts contained in national codifications, European legislation and modern model rules.

**Rock Climbing, 2nd Edition** Topher Donahoe 2014-09-22 • Approximately 35 new techniques, safety considerations, and subjects • National Outdoor Book Award winner in first edition • First edition of this popular title has sold 50,000 copies Thousands of rock climbers have learned the sport using Craig Luebben's seminal and bestselling text, *Rock Climbing: Mastering Basic Skills*. **Shook** Jennifer Hull 2020-09-15 Dave Hahn, a local of Taos, New Mexico, is a legendary figure in mountaineering. Elite members of the climbing community have likened him to the Michael Jordan, Cal Ripkin, or Michael Phelps of the climbing world. The 2015 expedition he would lead came just one short year after the notorious Khumbu Icefall avalanche claimed the lives of sixteen Sherpas. Dave and his team—Sherpa sirdar Chhering Dorjee, assistant guide JJ Justman, base-camp manager Mark Tucker, and the eight clients who had trained for the privilege to attempt to summit with Dave Hahn spent weeks honing the techniques that would help keep them alive through the Icefall and the Death Zone. None of this could have prepared them for the earthquake that shook Everest and all of their lives on the morning of April 25, 2015. Shook tells their story of resilience, nerve, and survival on the deadliest day on Everest.

**Contentious Migrant Solidarity** Donatella della Porta 2021-09-30 In the context of both the financial crisis and the crisis of European migration politics, the notion of solidarity has gained renewed prominence and - as this book argues - its practice has become increasingly contentious. Intersecting crises have sharpened social and political polarization and have contracted simultaneously the space for migrant and minority rights as well as the rights around political dissent. Building upon social movement and migration studies, this book maps the two sides of 'contentious solidarity': a shrinking civic space and its contestation by civil society. The book thereby unfolds the variety of repressive means (physical, legal, administrative and discursive) employed by governmental and non-governmental bodies against migrant solidarity, but also looks at how civil society organizations react to these restrictions through at times moderation and at times increasing contention. The diagnosis of 'contentious solidarity' is located within two broader trends affecting the relationship between the state and civil society in a neoliberal context in general and since the financial crisis in particular. Bridging studies on social movement studies and civil society organizations, this volume contributes to recent reflections on repression of social movements as well as of a hybridization of civil society organizations. Given its broad scope and the utmost timeliness of the issues it addresses, the volume will be of interest to a broad academic and non-academic audience.

Sandford 2010 Ecology and Wonder celebrates Western Canada's breathtaking landscape. The book makes several remarkable claims. The greatest cultural achievement in the mountain region of western Canada may be what has been preserved, not what has been developed. Protecting the spine of the Rocky Mountains will preserve crucial ecological functions. Because the process of ecosystem diminshment and species loss has been slowed, an ecological thermostat has been kept alive. This may well be an important defence against future impacts of climate change in the Canadian West. **Professional Nomad** Maurice E. It will provide the interested reader with a first hand account and deeper understanding of the multilayered and sinuous development that finally led to the present architecture of this theory.

**Continental Divide: A History of American Mountaineering** Maurice Isserman 2016-04-25 This magisterial and thrilling history argues that the story of American mountaineering is the story of America itself. In Continental Divide, Maurice Isserman tells the history of American mountaineering through four centuries of landmark climbs and first ascents. Mountains were originally seen as obstacles to civilization; over time they came to be viewed as places of redemption and renewal. The White Mountains stirred the transcendentalists; the Rockies and Sierras pulled explorers westward toward Manifest Destiny; Yosemite inspired the early environmental conservationists. Climbing began in North America as a pursuit for lone eccentrics but grew to become a mass-participation sport. Beginning with Darby Field in 1642, the first person to climb a mountain in North America, Isserman describes the exploration and first ascents of the major American mountain ranges, from the Appalachians to Alaska. He also profiles the most important American mountaineers, including such figures as John C. Frémont, John Muir, Annie Peck, Bradford Washburn, Charlie Houston, and Bob Bates, relating their exploits both at home and abroad. Isserman traces the evolving social, cultural, and political roles mountains played in shaping the country. He describes how American mountaineers forged a "brotherhood of the rope," modeled on America's unique democratic self-image that characterized climbing in the years leading up to and immediately following World War II. And he underscores the impact of the postwar "rucksack revolution," including the advances in technique and style made by pioneering "dirtbag" rock climbers. A magnificent, deeply researched history, Continental Divide tells a story of adventure and aspiration in the high peaks that makes a vivid case for the importance of mountains to American national identity.

**The Guiding Spirit** William Lowell Putnam 1986-01-01 The first professional mountain guides to be employed in North America were all Italians: Guiseppe Petigax and Lorenzo Croux of Courmeyer, Antonio Maguinaz and Andrea Pellissier of Valtournanche and Erminio Botta of Beilla, all in the retinue of Luigi Amadeo of Savoia, Duke of the Abruzzi whose successful expedition to Mount Saint Elias in 1896 became an Alaskan and mountaineering legend. The next summer, Professor H.B. Dixon followed his example and engaged Peter Sarbach to accompany him on several weeks of climbing in the "Canadian Alps". It was the obvious success of this particular act which prompted the Vaux brothers, distinguished amateur scientists of Philadelphia, to suggest again in 1898 that the Canadian Pacific Railway should engage some Swiss guides to be available for their patrons in the mountain regions the company was seeking to exploit. This is the story of those men, who prided themselves not merely on being guides, but on being Swiss guides. These men carved out a unique niche in the loyalties they both earned and gave. Their words often indicated conflict, hardship and unhappiness; but their actions were those of persons engaged in a rewarding vocation, who had found an emotional satisfaction in life that few of us are privileged to enjoy. Here then is the story of the CPR's Swiss guides as written by Andrew J. Kauffman and William L. Putnam. Over many years of mountaineering adventures in Canada, they interviewed Edward Feuz Jr., (Uncle Ed) and researched the archives for the facts and stories of which this book is composed. This is a story of mountain adventure in a newly awakening country -- western Canada -- a story which will be hard to put down once begun!

**Where the Mountain Casts Its Shadow** Maria Coffey 2007-04-01 Without risk, say mountaineers, there would be none of the self-knowledge that comes from pushing life to its extremes. For them, perhaps, it is worth the cost. But when tragedy strikes, what happens to the people left behind? Why would anyone choose to invest in a future with a high-altitude risk-taker? What is life like in the shadow of the mountain? Such questions have long been taboo in the world of mountaineering. Now, the spouses, parents and children of internationally renowned climbers finally break their silence, speaking out about the dark side of adventure. Maria Coffey confronted one of the harshest realities of mountaineering when her partner Joe Tasker disappeared on the Northeast Ridge of

Everest in 1982. In *Where the Mountain Casts Its Shadow*, Coffey offers an intimate portrait of adventure and the conflicting beauty, passion, and devastation of this alluring obsession. Through interviews with the world's top climbers, or their widows and families—Jim Wickwire, Conrad Anker, Lynn Hill, Joe Simpson, Chris Bonington, Ed Viesturs, Anatoli Boukreev, Alex Lowe, and many others—she explores what compels men and women to give their lives to the high mountains. She asks why, despite the countless tragedies, the world continues to laud their exploits. With an insider's understanding, Coffey reveals the consequences of loving people who pursue such risk—the exhilarating highs and inevitable lows, the stress of long separations, the constant threat of bereavement, and the lives shattered in the wake of climbing accidents. *Where the Mountain Casts Its Shadow* is a powerful, affecting and important book that exposes the far-reaching personal costs of extreme adventure.

**Extreme Alpinism** Mark Twight 1999-08-31 \* The book that launched a renaissance in climbing technique and remains relevant today \* Techniques and mental skills needed to climb at a more challenging level \* Illustrated with full-color photos throughout Big, high routes at the edge of a climber's ability are not the places for inventing technique or relying on old habits. The only master class in print, *Extreme Alpinism* delivers an expert dose of reality and practical techniques for advanced climbers. Focusing on how top alpine climbers approach the world's most difficult routes, Twight centers his instruction on the ethos of climbing the hardest routes with the least amount of gear and the most speed. Throughout, Twight makes it clear that the two things he refuses to compromise are safety and his climbing ethics. In addition to the extensive chapters on advanced techniques and skills, Twight also discusses mental preparedness and attitude; strength and cardiovascular training; good nutrition; and tips on equipment and clothing.

**Mountaineering Tourism** Ghazali Musa 2015-06-05 In May 1993 the British Mountaineering Council met to discuss the future of high altitude tourism. Of concern to attendees were reports of queues on Everest and reference was made to mountaineer Peter Boardman calling Everest an ‘amphitheater of the ego’. Issues raised included environmental and social responsibility and regulations to minimize impacts. In the years that have followed there has been a surge of interest in climbing Everest, with one day in 2012 seeing 234 climbers reach the summit. Participation in mountaineering tourism has surely escalated beyond the imagination of those who attended the meeting 20 years ago. This book provides a critical and comprehensive analysis of all pertinent aspects and issues related to the development and the management of the growth area of mountaineering tourism. By doing so it explores the meaning of adventure and special reference to mountain-based adventure, the delivering of adventure experience and adventure learning and education. It further introduces examples of settings (alpine environments) where a general management framework could be applied as a baseline approach in mountaineering tourism development. Along with this general management framework, the book draws evidence from case studies derived from various mountaineering tourism development contexts worldwide, to highlight the diversity and uniqueness of management approaches, policies and practices. Written by leading academics from a range of disciplinary backgrounds, this insightful book will provide students, researchers and academics with a better understanding of the unique aspects of tourism management and development of this growing form of adventure tourism across the world.

**Lydia Bradey: Going Up Is Easy** Laurence Fearnley 2015-05-27 Provocative, stirring, and beautifully co-written by novelist Laurence Fearnley, *Lydia Bradey: Going Up is Easy* is the story of how one woman took on the mountaineering world and won. In 1988, Lydia Bradey became the first woman to climb Mount Everest without supplementary oxygen. She made the ascent alone and to date she is the only New Zealander to have made an oxygen-free ascent. Her climb was a truly remarkable achievement but also an internationally controversial one. *Going Up is Easy* details for the first time the events surrounding Bradey's historic feat, as well as her many hair-raising expeditions through Alaska, Bhutan, Nepal, Pakistan, India, China, Europe, and New Zealand. In the spirit of John Krakauer's *Into Thin Air* or Joe Simpson's *Touching the Void*, *Going Up is Easy* celebrates a life lived on the edge. Through her stories, we encounter a woman propelled by curiosity and passion to become one of the greatest female high-altitude adventurers of recent times. Co-written with acclaimed novelist Laurence Fearnley, a long-time friend of Bradey, and stunningly illustrated throughout, *Going Up is Easy* is a life story by turns dramatic, tender, funny, frank and inspiring. Lydia Bradey is one of Australasia's foremost high-altitude mountaineers. Beginning her alpine career in the 1970s, she made her first ascent of Aoraki/Mount Cook while still a teenager. Following her dream to become a climber, she travelled to Alaska, Nepal, Bhutan and Pakistan, where, in 1987, she became the first Australasian woman to climb an 8000-metre peak, Gasherbrum 2. In 1988, she made a historic ascent of Mount Everest, becoming the first woman to reach the summit without supplementary oxygen. Employed as a professional mountain guide, she has made two further ascents of Everest as well as climbed and guided extensively throughout Nepal, Pakistan, Antarctica, South America, Africa and Europe. She lives at Lake Hawea, Otago, with her partner — and fellow mountain guide — Dean Staples. Also available as an eBook

**Macedonia** Thammy Evans 2012 An updated guide to this top new tourist destination.

**Himalayan Dreaming** Will Steffen 2010-07-01 How did climbers from the world's flattest, hottest continent become world-class Himalayan mountaineers, the equal of any elite mountaineer from countries with long climbing traditions and home ranges that make Australia's highest summit look like a suburban hill? This book tells the story of Australian mountaineering in the great ranges of Asia, from the exploits of a brash, young colonial with an early British Himalayan expedition in the 1920s to the coming of age of Australian climbers in the 1980s. The story goes beyond the two remarkable Australian ascents of Mt Everest in 1984 and 1988 to explore the exploits of Australian climbers in the far-flung corners of the high Himalaya. Above all, the book presents a glimpse into the lives - the successes, failures, tragedies, motivations, fears, conflicts, humor, and compassion - themselves to the ultimate limits of survival in the most spectacular and demanding mountain arena of all.

**The Making of a Rescuer** Nicholas Campbell Corff 2012-11-26 This is a book about the making of a hero - a rescuer. There are few of us that can claim to be bigger-than-life heroes, but surely the story of Dr. Otto Trotts life is the story of one of these. Because of his existence many lives have been saved or improved, human suffering has been reduced, and the world is a better place. What greater statement can be made about a person? A hiker sees the beautiful blue of a mountain gentian just off the trail and stops to capture the image through a snapshot, but in seeking a slightly wider angle steps back -- in a flash the hiker lies injured amid the rocks. A snowboarder searches for untouched powder snow, but finds a cliff instead. A small plane has engine trouble and glides steeply toward a mountain meadow. An early snowstorm catches two climbers exposed in the high alpine. An avalanche buries a foolish snowmobiler trying to make the highest mark on the side of snow-covered slope. An older gentleman has a heart attack far from his city hospital. Its quite possible and even probable that what all of the above have in common is Dr. Otto Trott. He co-founded the search and rescue organization that seeks out the injured and carries them down from the mountains, he pioneered the medical treatments that will be used for hypothermia and frostbite, he introduced advanced European methods of climbing as well as the identification of avalanche danger areas and the systematic search for and rescue of accident victims. Most importantly, Otto taught generations of others to follow in his footsteps. As Lou Whittaker, the renowned mountain guide states, This book is a must for anyone who seeks the mountains and their reward. Dee Molenaar the acclaimed mountaineer, artist and writer, says that this treatise is long overdue, while the legendary high altitude premier climber Jim Wickwire writes that Nicholas Corff has brought to life the fascinating story of Otto Trott There is no question that Dr. Otto Trott was one of those few men who was a legend in his own time, but he always remained a man of great empathy as well as skill who sought to relieve suffering, improve the safety of the outdoors and protect the mountain environment he so loved. In his long and adventuresome life he overcame great loss with courage and perseverance, and ultimately was the recipient of many awards including the Jefferson Award. Along with the text there are over 250 full page photos and illustrations.

**North Macedonia** Thammy Evans 2019-06-06 *Bradt's North Macedonia* remains the only standalone English-language guidebook to this increasingly popular destination available outside the country. Originally written by Thammy Evans, a political analyst who lived in Macedonia for five years, this new edition has been thoroughly updated and restructured to make it even easier to use by Philip Briggs, arguably the world's most experienced guidebook writer. Coverage of national parks has been increased and hiking information has been fully integrated to make it more accessible to casual users. Introductions to many points of interest have been expanded to give more of an overview of what the attractions are and there are several new and redrawn maps. Of all the new countries formed following the break-up of Yugoslavia in 1991, Macedonia was the only one to attain independence without bloodshed. This is a small land that offers huge variety to travellers, from the oldest lake in Europe to soaring forest-swathed mountain ranges and from the millennia-old Neolithic rock observatory at Kokoni and Roman mosaics at Heraclea, to dozens of historic and actively-used mediaeval monasteries and mosques. Macedonia's urban centrepiece and main port of entry is the capital Skopje, now home to a wealth of Ottoman buildings, a lively culinary scene, and several world-class museums, while the main tourist hub is the pretty lakeshore town of Ohrid, a UNESCO World Heritage Site thanks to its wealth of medieval churches and other architectural gems. A trio of national parks provide refuge to brown bears, grey wolves, the rare Balkan lynx and a wide variety of birds. And wherever you go, welcoming family-run tavernas and lively pavement cafés serve authentic traditional cooking and locally produced wine that ranks as probably the most affordable anywhere in the European Balkans. Wherever you go and whatever your interest, this is a country that offers countless rewards to independent-minded travellers and those who want to get away from the crowds. And with *Bradt's Macedonia*, you'll find everything you need for a successful trip.

**Sport, Outdoor Life and the Nordic World** Nils Asle Bergsgard 2020-05-21 Sport, Outdoor Life and the Nordic World explores the Nordic model of sport and outdoor life with respect to such issues as sport facilities, mountain guiding, women and ethnic minorities, urban planning, anti-doping, health, elite sport coaching and leadership, and the globalization of sport. The aims of the volume are twofold. First, it advances knowledge of Nordic sport and outdoor life, as important fields of social activity in their own rights. Second, it enhances the understanding of the 'Nordic model' of society, and the ways in which this is constructed, explored and challenged within and through sport and outdoor life activities. In doing so, the contributors explore a range of key themes, notably: how modern Nordic sport and outdoor life activities emerged and are organized through specific social policies; how they may challenge or harbour forms of social exclusion, particularly in regard to gender or minority populations; how they are affected by, and respond to, deviant practices such as doping; how they may contribute to alleviating social problems; and how they confront major structural challenges and changes, such as the impacts of globalization and the continuing dominance of neoliberal economic policies. Interdisciplinary in approach, Sport, Outdoor Life and the Nordic World is essential reading for those studying Nordic sports and societies, and will also appeal to students, academics and wider readers with interests in sport studies, sociology, social policy, cultural studies, anthropology and public health. The chapters were originally published as a special issue of Sport in Society.

**Coaching, Sport and the Law** Neil Partington 2021-05-12 The interdependent coach-athlete relationship represents the most fundamental instance of a duty of care in sport. This book defines, analyses and clarifies the duty of care incumbent upon sports coaches and identifies important recommendations of real-world significance for coaching practice. Given the dynamic relationship between coaching, sport and the law, it is imperative that coaches have an informed awareness of the evolving legal context in which they discharge their duty of care. Detailed analysis of a coach's duty of care has so far been lacking. The book addresses this gap by being the first to critically scrutinise the concept of duty of care in the specific context of sports coaching. Sustained analysis of the developing case law allows the scope and boundaries of the particular duties demanded of coaches to be rigorously examined. The legal principles and court decisions discussed relate to coaching delivered in a wide range of individual and team sports, at both amateur and professional levels of performance, and include common scenarios and challenges frequently encountered by sports coaches globally. By adopting an interdisciplinary approach within a broader sociolegal methodological framework, this book's detailed analysis and original insights will prove highly instructive for practising coaches, coach educators, and national governing bodies of sport. It also offers extremely valuable insights for students, teachers and practitioners involved in sports law, sports coaching, sports ethics, tort law, sports policy and development, sports studies and physical education.
